

Task 4 Report - Dashboard Integration

Introduction:

This report describes the dashboard developed to integrate Task 1 (chatbot.py), Task 2 (nlp_chatbot.py), and Task 3 (model.pkl).

System Design:

- Chatbot modules connected to dashboard interface
- Model.pkl loaded for predictions
- User-friendly UI built with Streamlit/Flask

Features:

- Chatbot interaction panel
- Prediction display using trained CNN model
- Visualization of results

Screenshots:

- dashboard_ui.png : Dashboard interface
- dashboard_prediction.png : Prediction example

Deliverables:

- dashboard.py / Task4_Dashboard.ipynb
- Screenshots (PNG files)
- Task4_Report.pdf

Conclusion:

The dashboard successfully integrates all tasks and provides a unified interface for chatbot and model interaction.
